

# MCH 2021 and Corona

Eventually consistent

Team Safety - nino

- 1. Team Safety: who are we and what is our goal?**
- 2. About corona: predicting the weather next year**
- 3. What if**
- 4. Scenarios**
- 5. See you in 2021!**

# 1. Team Safety: what is our goal?

**with everyones help we aim to have an inspiring, accessible, safe and healthy tech conference!**

**corona poses some interesting questions, which we can only handle together.**

**Team Safety - MCH Fieldday**

## **2. About corona: predicting the weather next year**

**Before February we had no idea about Corona.**

**‘May Contain Hail 2021’, or maybe not.**

**Can we be ‘eventually consistent’ ourselves?**

**Team Safety - MCH Fieldday**

### **3. What if**

**Many questions, lots of uncertainty.**

**We might have a vaccin, or not. We don't know yet.**

**The event will be different, but still very cool and worth organising.**

**If we don't try, we are sure it will not happen!**

**Team Safety - MCH Fieldday**

## **4. Scenarios**

**Three scenarios are ‘work in progress’:**

**1. Outbreak: stricter measures**

**2. Current: continue as we go**

**3. Improvement: more freedom, more hugs.**

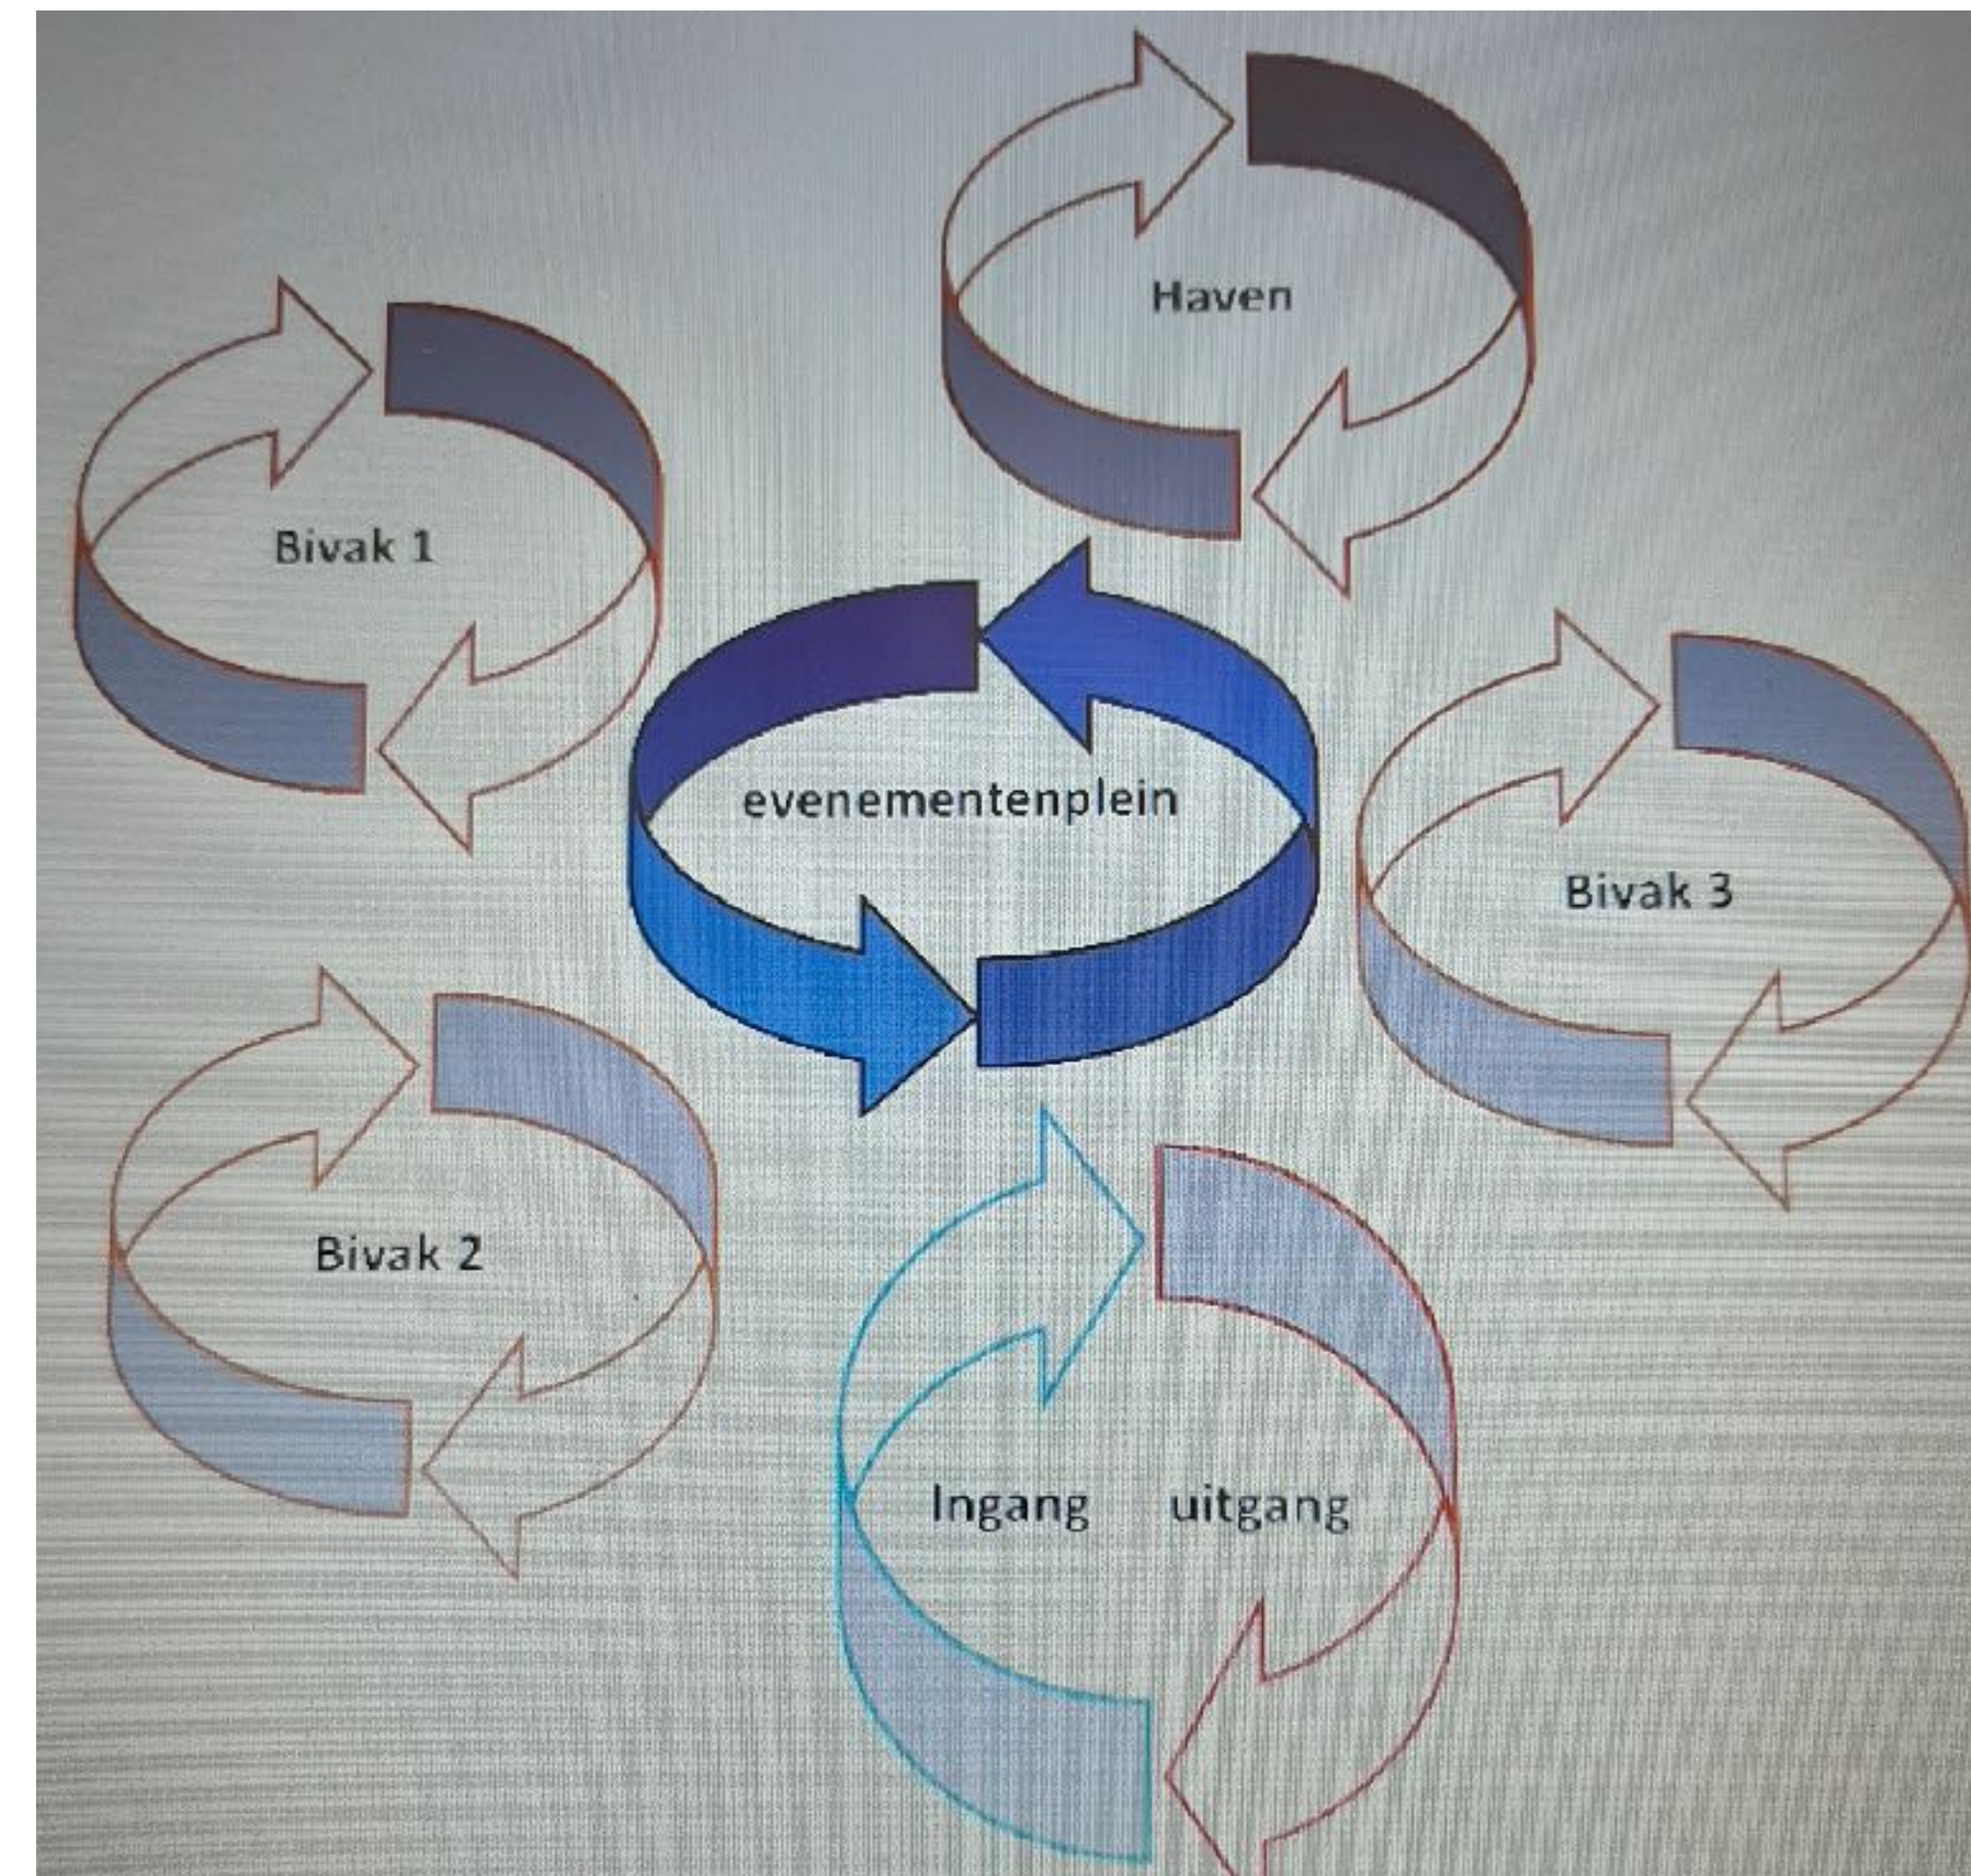

## 4. Scenarios

**Current situation in the Netherlands (as of august 10th):**

- **1.5 meter distance**
- **crowd management: flows**
- **hygiene**
- **reserved seats**
- **health check**
- **foodcourt: registration**

**Team Safety - MCH Fieldday**

## 4. Scenarios

**Do we have enough space to keep distance?**

## **4. Scenarios**

**We think we can organise an event under the current rules.**

**Outbreak: not so. Improvement: Unicorns!**

**It will be different. It will be cool. It will be a hacker conference.**

**It will, eventually, be consistent.**

**Team Safety - MCH Fieldday**

**5. See you in 2021!**

**stay healthy and help each other!  
all the best from Team Safety.**
